Professor J. Lederberg
Department of Genetics
School of Medicine
Stanford University
Medical Center

Dear Joshua:

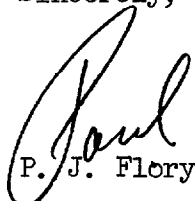

I think the evidence indicates that Eigen will not accept our invitation, nor do I think it is likely that he will take any other of the various offers tendered to him by other American universities--at least not in the near future.

Marvin Chodorow's expansion of the Applied Physics Division, and his strengthening of instrumentation here should be a definite asset in other campaigns we have under consideration. I look forward to meeting him and learning more of his plans.

Flory

Thanks for your note.

Sincerely,

P. J. Flory
